Midterm Seatwork #2 - Smart Wallet System

package account;

import java.util.Scanner;

public class Seatwork {

public static void main(String[] args) {

Scanner scan = new Scanner(System.in);

double balance = 5000;

int choice;

int success = 0;

while (true) {

System.out.println("\n==== SMART WALLET MENU ====");

System.out.println("1. View Balance");

System.out.println("2. Cash In");

System.out.println("3. Send Money");

System.out.println("4. exit");

System.out.println("Enter choice: ");

choice = scan.nextInt();

switch (choice) {

case 1:

System.out.println("Current Balance: " + balance + " Pesos");

break;

case 2:

```
System.out.println("Enter amount to cash in: ");  
double cashIn = scan.nextDouble();
```

```
if (cashIn > 0) {  
    balance += cashIn;  
    success++;  
    System.out.println("Cash in successful!");  
    System.out.println("New balance: " + balance);  
} else {  
    System.out.println("Invalid Amount!");  
}  
break;
```

case 3:

```
System.out.println("Enter amount to send: ");  
double send = scan.nextDouble();
```

```
if (send < 100) {  
    System.out.println("Minimum Amount is 100 pesos.");  
} else if (send > 1000) {  
    System.out.println("Maximum per transaction is 1000 pesos.");  
} else if (send > balance) {  
    System.out.println("Insufficient Balance.");  
} else {  
    balance -= send;  
    success++;  
    System.out.println("Money sent successfully!");  
}  
break;
```

case 4:

```
system.out.println("Exiting program...");
system.out.println("Total successful Transactions: " + success);
return;
```

default:

```
system.out.println("Invalid choice! Try again");
```

```
}
```

```
}
```

```
}
```

```
}
```

sample execution

==== SMART WALLET MENU =====

1. View Balance
2. Cash In
3. Send Money
4. Exit

Enter choice: 1

Current Balance: 5000.0 pesos

==== SMART WALLET MENU =====

1. View Balance
2. Cash In
3. Send Money
4. Exit

Enter choice: 2

Enter amount to cash in:

2000

Cash in successful!

New Balance: 7000.0

==== SMART WALLET MENU =====

1. View Balance
2. Cash In
3. Send Money
4. Exit

Enter choice: 3

Enter amount to send:

2000

Maximum per transaction is 1500 pesos.

==== SMART WALLET MENU =====

1. View Balance
2. Cash In
3. Send Money
4. Exit

Enter choice: 4

Exiting program...

Total successful Transactions: 1

Short explanation

The while loop displays the menu periodically until the user selects the exit option, which keeps the program running continuously. Depending on the user's selected option such as view balance, cash in, send money, exit, the switch case executes several code blocks to manage the menu selection. Before approving a transaction, the if-else statements are used to verify conditions such as available balance and minimum and maximum per transaction.
